

AZ Vocabulary

1. You can use different strategies to solve a subtraction problem.

To subtract, you can think addition.

$$90 - 70 = ?$$

Think:

$$70 + ? = 90$$

$$70 + 20 = 90$$

So, $90 - 70 = \underline{\quad}$.

To subtract, you can **count back** on a **number line**.

$$90 - 20 = ?$$

$$90 - 20 = \underline{\quad}$$

2. Use the strategy you think works best to solve each problem.

$$90 - 60 = \underline{30}$$

$$70 - 50 = \underline{\quad}$$

$$70 - 30 = \underline{\quad}$$

$$60 - 20 = \underline{\quad}$$

On the Back!

3. Draw a number line to subtract $70 - 20$.
How did you solve the problem? Explain.
