

AZ Vocabulary

1. You can use what you know about subtracting **ones** to subtract **tens**.

$7 - 2 = 5$

$70 - 20 = ?$

Show 7 tens. Take away 2 tens.

Count the tens left over.

Then complete the **equations**.

7 tens - ____ tens = 5 tens, so $70 - 20 = \underline{\quad}$.

2. Write the numbers to complete each equation.

4 tens - 3 tens = 1 ten

____ - ____ = ____

____ tens - ____ tens = ____ tens

____ - ____ = ____

____ tens - ____ tens = ____ tens

____ - ____ = ____

On the Back!

3. Draw place-value blocks to show 7 tens. Cross out some of the tens. Write an equation to match what the blocks show.
