

1. Use the strategy you think works best to solve the subtraction problem.

$90 - 30 = \underline{\hspace{2cm}}$

- (A) 70
- (B) 60
- (C) 50
- (D) 40

2. Which is NOT the length of the pickle?

Choose three that apply.

- about 2 cubes
- about 4 cubes
- about 6 cubes
- about 8 cubes

3. Count the tens and ones. Then write how many there are in all.

\_\_\_\_\_ tens and \_\_\_\_\_ ones

\_\_\_\_\_ in all
