A Clever Trick

(read the following passage, make a prediction)

One day a mother quail was hunting for insects to eat. Suddenly, she heard a noise. It was just a twig breaking, but it was enough to make her look up and see a fox twenty feet away. Immediately, the quail knew she had to protect her chicks from this enemy. First, she spread her wings, flew high into the air, and settled in the middle of the path between the fox and her baby chicks. Squawk! Squawk! Squawk!

What do you think happened next? Make a prediction. We will finish reading this story in class! 😊
